

AVINASH UCHADIYA

Senior Frontend Developer

☎ 62648-26150 ✉ avinashuchadiya786@gmail.com 🌐 avinashuchadiya 🐙 uchadiya00002

Personal Summary

- 4+ years of experience in software development with expertise in JavaScript, TypeScript, React.js, Node.js, GraphQL, Next.js, Express.js, AWS, and Redux.
- Built responsive, user-centric UIs with strong accessibility, cross-browser compatibility, and web standards compliance.
- Delivered scalable, visually rich web applications with modern design principles and seamless user experiences.
- Followed Test-Driven Development (TDD) practices in Agile environments to write clean, maintainable, and reliable code.
- Created style guides, defined UI standards, and enforced frontend best practices to ensure consistency across teams.
- Experienced in Agile methodologies including Scrum, Sprint Planning, requirement gathering, and collaborative development.
- Managed multiple projects in fast-paced environments while maintaining high code quality and effective team collaboration.

Education

Shri Vaishnav Vidyapeeth Vishwavidyalaya

May 2015 – June 2019

Bachelor of Engineering - Computer Science

Indore, MP

Technical Skills

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

Databases: MongoDB, MySQL, PostgreSQL

Frameworks/Tech: React.js, Next.js, Node.js, Express.js, Firebase, Redux, Redux Toolkit, Saga, Thunk, TanStack Query, Lodash, TailwindCSS, Bootstrap, tRPC, Drizzle ORM, Better-auth

Testing: Jest, Cypress

Development Practices: Agile/SCRUM, Code Reviews, CI/CD, Git Workflow, Performance Optimization, REST & GraphQL API Integration

Tools: VS Code, Git, Figma, Cursor, Windsurf, Postman, Chrome DevTools

Experience

Hotbit Infotech Pvt. Ltd

Oct 2023 – Present

Software Engineer

Indore, MP

- Designed and developed scalable web applications using **React.js, Next.js, Node.js, and PostgreSQL**, ensuring maintainable architecture and optimized performance.
- Led end-to-end software development lifecycle including requirement analysis, architecture design, sprint planning, deployment, and post-launch improvements.
- Built and optimized **custom video player** and content aggregation platform (CA Art) using Domain-Driven Design (DDD), improving performance and search efficiency.
- Enhanced front-end rendering performance by 30% through lazy loading, React.memo, and code-splitting techniques.
- Mentored junior developers, conducted code reviews, and implemented CI/CD pipelines to ensure high-quality, production-ready releases.

- Developed and maintained responsive, interactive web applications using **Next.js, React.js, Redux Toolkit, and Tailwind CSS**.
- Delivered cross-browser and mobile-friendly UI components that improved responsiveness and reduced layout shift by 25%.
- Collaborated closely with backend and design teams to implement dynamic dashboards using charts, tables, and reusable components for data visualization.
- Optimized codebase and reduced bundle size through code refactoring, tree-shaking, and dynamic imports, improving load times and overall performance.
- Provided recommendations on integrating modern tools and frameworks to align with business goals and enhance scalability.

Projects

RankerBuddy - Founding Frontend Developer

- Architected and developed a B2B/B2C e-learning platform using **Next.js, Tailwind CSS, and Redux Saga**, featuring NCERT Class 10–12 notes, MCQs, solved papers, and interactive games.
- Integrated dynamic MCQs, gamified learning modules, and responsive layouts accessible across web and Android platforms.
- Improved performance and scalability, enabling 100,000+ Play Store downloads and increasing student engagement by 40%.

Vegetable & Butcher - Frontend Engineer

- Engineered flexible pause/cancel subscription workflows, improving user control and retention rates.
- Revamped checkout UI, implemented default payment methods, and integrated secure payment flows using modern APIs.
- Built secure account management with Google API integration, password reset, and verified email authentication.
- Delivered product rating features, optimized mobile experience via PWA support, and improved overall engagement metrics.

Community Forum Platform - Full-Stack Engineer

- Architected a production-style forum application using **Next.js App Router**, TypeScript, PostgreSQL, Drizzle ORM, React Query, and Elysia following layered architecture principles.
- Implemented secure role-based authorization, paginated discussion feeds, bookmark management, and efficient hydration of user-specific metadata (*hasSaved*, *savesCount*).
- Designed idempotent save/un-save workflows using soft deletes to preserve historical records while preventing duplicate active bookmarks.
- Separated business logic, API, data access, and presentation layers to improve maintainability, testability, and scalability.
- Added multilingual support with proper pluralization and comprehensive unit and integration tests covering business rules and authorization scenarios.
